

48v inverter pure positive wave

Overview

What is a 48 Volt inverter?

It is a device that converts 48V Direct Current to 120V (110v) Alternating current. In other words, it is a device that can take current from a bank of batteries(48V) and convert it to the type supplied in the grid to power your appliances and devices. I suggest you. Picking the right inverter is a very critical choice. To make the process as easy as possible for you, we have put together a list of key points to consider when choosing your.
