

Does Amman use a lot of outdoor power

Overview

Energy management is a big challenge for Jordanian economy due to the paucity of local energy resources and relying on imported energy sources. The energy demand of tons of oil equivalent is. Investigation the consumption pattern in the electric energy sectors at regional and global level shows a clear trend of increasing energy consumption in most countries of the world from 1990 to. The building type influences the energy consumption pattern. According to the USA energy research, like (lee's study in 2009) titled "The Influence of Urban Form on GHG Emissions in the U.S. Household Sector," multi-family building with more than five family's apartments use nearly 40% of electric power less than building with single families. On.
