

## How to choose lead-acid battery for inverter

### Overview

Generally speaking, batteries are an indispensable part of a solar power system because they allow us to store power generated by the solar panel in the battery, ensuring that the user has power available when the solar panels and the grid are running low. Add a battery to a solar power. Currently, there are mainly two types of battery on the market: lead-acid battery and lithium battery, both of them have their own advantages and. Choosing between LiFePO<sub>4</sub> and Lead Acid batteries for solar systems requires considering efficiency, lifespan, and environmental impact.
