

Residential Wind Power Generation System

Overview

These residential wind turbines were selected for their consistent designs, variable sizes, and (when possible) third-party testing approval. We also chatted with wind expert and general wind turbine critic Paul Gipe for an overview of what not to pick when getting a home wind. The following wind turbines represent solid designs, good build quality, and a satisfied customer base. While the essential design of the turbine itself. When we sat down with Paul Gipe—wind expert with over 40 years of experience in the industry and creator of Wind Works—it became clear that there was more to learn to avoid than to seek out. Getting good wind energy is as much a game of avoiding bad energy. If that's what to avoid, what should you actually be getting?

And what do you need to think about before getting one of the best home wind turbines?
